

AXXIOME CORE

Accelerating SAP Implementations

OVERVIEW

Core Banking transformation projects are seen as long, weary and very risky exercises, so financial institutions are hesitant to embark on such journeys. SAP banking solutions are known as great solutions by the market. In particular in banking, SAP's platform has enabled Tier 1 and 2 banks to modernize their business and Tier 4 and new challenger banks to digitize or launch their businesses, probing its flexibility, extensibility and scalability.

Axxiome is a worldwide leader in banking transformation programs. SAP solutions are in Axxiome's DNA, having successfully executed and implemented several transformation programs worldwide. Axxiome has incorporated all this expertise into their Axxiome Core, to help banks achieve their targets with minimum costs, effort and risk.

Axxiome Core reduces time, risk and complexity in all banking transformations programs by providing a fully configured and localized banking platform that is capable of massively accelerating transformation programs with reduced risk and complexity. Axxiome Core will serve banks for the coming decades, seamlessly adapting to new technology and constantly improving the customer experience.

Axxiome Core is part of the Axxiome Banking Suite, a suite of banking products that provide banks with an end-to-end banking platform to cover all lines of business and operations with the latest and most flexible technology.
